

DADONG COIL ENGINEERING

Milestones:

- 1995: Dandong Dadong Coil Engineering Co.,Ltd. established.
- 1998: Power choke series were put into production
- 1999: Plastic injection lines were setup for production ,Thermosetting bobbins started mass production using self-manufactured material.
- 2000: Transformers for digital cameras were produced, Magnetic cores started mass production using self-manufactured material.
- 2002: Stamped metal terminals started mass production using self-manufactured material.
- 2003: Thermoplastic bobbins started mass production using self-manufactured material.
- 2005: Carbide tape for packaging started mass production using self-manufactured material.
- 2008: Electroplating of terminal strips started mass production using self-manufactured material.
- 2010: Automatic production line reconstructed.
- 2013: LED power supply, inductance coil and transformer automated lines set up.
- 2014: Automatic choke coil line for motor products set up.

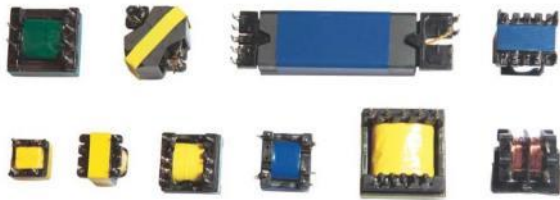

SYSTEM CERTIFICATION EVOLUTION

- OCT.1998:** Passed ISO 9002:1994 Quality System certification (Certificate no.: 0798B243).
- JAN.2004:** Passed ISO 9001:2000 Quality System certification (Certificate no.: 01 100 039007).
ISO 14001:1996 Environmental System certification (Certificate no.: 01 104 031670).
- SEP.2005:** Passed Certified Green Partner of Sony (Certificate no.: 8233).
- MAR 2006:** Passed ISO 14001:2004 Environmental System certification (Certificate no.: 01 104 031670).
- JAN 2010:** Passed ISO9001: 2008/ISO14001: 2009 Quality Environmental System (Certificate no.: 100/104 37578 TMS).
- MAR.2013:** Passed ISO9001:2008/ISO14001: 2009 Environmental Management System certification (Certificate no.: 01 100/104 126834 TMS).
- SEP.2015:** Passed ISO/TS 16949: 2009 Quality System certification (Cert #: 01 111 126834 / 01; 01 111 126834 / 02 TMS).

MAIN PRODUCTS

LED power supply Inductance coils and transformers

High Voltage coil

Toroidal coil

APPLICATIONS:

Products are used in LED lighting drivers

DCE Advantage : Advanced production technology, Strict material selection criteria and production process control. Compliance with ROHS, e.g., the EU standards.

Choke coil for, Electric Motors

APPLICATIONS:
Used for filter on motors

DCE Advantage :
20+ years experience in manufacturing magnetic cores . Coil assembly process uses advanced automated production equipment to ensure consistency of the finished product. We promise short customer cycle times , high quality and low cost to our clients to help them gain a competitive advantage in market.

Transformer for digital camera

Power inductor

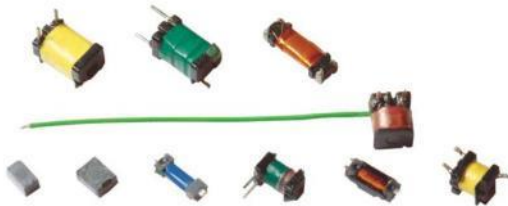

Plastic Injection product

Ferrite core

Trigger coil for digital camera

DCE Advantage: Integrated Manufacturing. All major components produced in-house

MAIN EQUIPMENT

Address: No.14 Huanghai Street, Zhenxing district, Dandong, Liaoning, China
(Ferrite Core Undertaking Dep.): No.35 Waihuan Road, Zhen An District
Dandong, Liaoning, China
